

Reactor-Ready Lab Reactor

Replace multiple reaction set-ups with a single universal system that accepts vessels from 100ml to 5 litres

Simple Stirrer Alignment slide and glide set and lock **Patented Stirrer Coupling** • drop in • no tools • no fuss **Standard Vessels** • 100ml to 5 litres vacuum jacketed option · glass accessories to match **Process Vessels** • mimic plant scale geometry • 100ml to 5 litres · vacuum jacketed option

Change to Reactor-Ready because...

...it saves space, time, money and improves your chemistry

Reactor-Ready Duo accepts two vessels and allows reactions in parallel or series

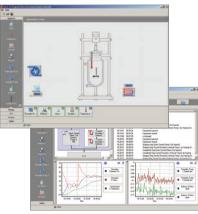

Optional software allows you to log & control stirrers, circulators, balances, pumps, temperature sensors

& other devices

Compatible with Radleys and other leading brands of overhead stirrer

Compatible with all leading brands of circulator and thermoregulator

Reactor-Ready

Swap reaction vessels in minutes, NOT hours

Reactor-Ready is designed as a universal reactor work station that can be used for different vessel sizes and different experiments. Reactor-Ready can easily and

quickly be configured to suit the chemistry and scale you need for each project.

The beauty of Reactor-Ready is that this one reactor work station can replace many. saving you money and fumehood space.

Features include

- Rapid vessel exchange with guick-release vessel clamp and hose couplings.
- Range of single and double jacketed vessels from 100ml to 5 litres.
- New range of process vessels to mimic larger scale plant or manufacturing reactors.
- Accepts all leading brands of overhead stirrer and allows easy, tool free adjustment.
- Triple support stand features heavy duty stainless steel support rods for strength and stability.
- Self aligning stirrer coupling engages without the need for tools.
- Temperature range: -70°C to +230°C.
- · Innovative hose manifolds allow easy thermofluid drain down.
- · Wide range of accessory glassware including condensers, dropping funnels etc.
- Optional software allows you to log & control stirrers, circulators, balances, pumps, temperature sensors & other devices.

- Unique clamp design allows vessel to be supported and clamped by a single operator in less than a minute.
- · Use the same clamp to hold all vessel sizes; plus the vessels remain supported even when the clamp is unlocked.

even when not clamped.

time when changing Vessels

by one person.

· Reactor-Ready uses an innovative support collar fitted to the neck of each vessel, which allows the vessels to be swapped

· The stainless steel collar locks securely into the support plate on the framework and allows the vessel to remain supported,

Support Collar

Unique Self aligning Stirrer Coupling saves

Vessel Support Collar aids vessel loading

in and out of the Reactor-Reactor core like a cartridge.

· Vessel exchange is tool free and can easily be undertaken

- · Patented drop-in stirrer coupling engages easily without the need for tools.
- Simply lower the stirrer coupling to engage with the stirrer guide below.
- · The stainless steel stirrer coupling will fit in any standard stirrer chuck.
- · The non-slip design ensures powerful stirring up to 500rpm, or 800rpm for short periods (subject to motor selected).

Choice of PTFE stirring shafts

- Reactor-Ready is offered with a choice of PTFE Stirring Shafts: Anchor, Retreat Curve and Turbine or Propeller styles.
- · PTFE Anchor Stirring Shaft is included with all standard reaction vessel kits.
- · PTFE Turbine Stirring Shaft is included with all process reaction vessel kits.

I-beam Support allows the Stirring Motor to be positioned with ease

- I-beam allows the stirrer drive to be raised or lowered without needing to remount the stirrer.
- Adjustable safety stop collars located below the I-beam allow the user to lower the stirrer motor to a set position for ease of operation and safety.
- Reactor-Ready accepts all leading brands of motor or air-powered overhead stirrer with support rods up to 16mm in diameter.

Whip-free stirrer guide

- The Reactor-Ready's PTFE stirrer guide screws directly on to the glass lid and features a unique extended support which provides whip-free agitation even at high speeds.
- The stirrer guide is chemically inert, gas tight and suitable for work under vacuum.

Quick Release PEEK Hose Couplings

- Operates over the temperature range -70°C to +230°C.
- Quick release, screwthread design allows rapid exchange of vessels without the use of tools.
- Simply tighten by hand for a leak tight seal.
- PEEK with Viton O-rings ensures all wetted parts are chemically resistant.
- Lightweight, metal free design prevents chipping and minimises strain on the glass fitting.
- All hoses have a 12mm ID, maximising thermofluid flow and heating/cooling performance.
- · Low thermal conductivity of PEEK reduces frosting when cooling.

Hose Manifolds allow easy Thermofluid drain down

- The inlet and outlet hoses from the Reactor-Ready vessel connect to manifolds attached to the support rod. These manifolds serve two important functions:
 - 1. Supports the hose running from the vessel, thereby eliminating stress on the glass sidearm.
 - Allows thermofluid drain down which provides a quick and clean method of removing the thermofluid from the vessel jacket when changing vessels.
- By opening the venting valve on the (upper) outlet manifold, thermofluid drains from the vessel back to the thermoregulator under gravity.
- Opening the drain tap on the (lower) inlet manifold allows drainage to an external reservoir.

PTFE Retreat Curve Stirrer

PTFE Turbine or Propeller Stirrer

Case Study: Accelerating process optimisation in a busy chemical development lab

Researchers at a leading US pharmaceutical company invested in Reactor-Ready for use in their chemical development lab. The process R&D group, specialising in small molecule research, are using Reactor-Ready for optimising new or existing chemistry, identifying and eliminating impurities, and screening process variables for transfer to kilo-labs, pilot plant and manufacturing sites.

Commenting on their existing methods the Lead Scientist said, "We use round bottom flasks, but temperature control via mantles or oil baths is poor. Alternatively, when we use traditional jacketed reactor vessels, we need a different set up for every scale change. Even changing a reactor of the same size takes ages."

"So I liked Reactor-Ready the minute I saw how easy it was to change reactors. Reactor-Ready does it all. I get one stand which fits all sizes up to 5 litres. I get overhead stirring on all scales. I get vacuum jacketed vessels, which provide excellent temperature control with minimum heat loss, which is a real advantage at low temperatures, and I get the ability to rapidly change out my reactors."

"The first time I changed vessels, it took about 5 minutes but now I can change in less than 2 minutes. That includes removing and attaching the heating fluid hoses. Occasionally I lose a drop or two of heat transfer fluid but most times I lose none. The thing I like about the system is the control and speed. I get better control of my reactions and I can vary my work or scale immediately".

4. If you need a thermoregulator, hoses, hose adapters, thermofluid or accessory glassware, then select from the accessory list.

5. If you need automation add the Control Software and Data Hub.

It is the attention to detail and wealth of innovative features that makes Reactor-Ready so much better

Precision ground lid and vessel flanges combine with PTFE collar and FEP encapsulated O-ring to offer superior sealing performance.

Vessel clamp support allows easy vertical repositioning of the vessel whilst maintaining the stirrer coupling alignment.

Venting stopcock on the outlet manifold allows quick and easy draining of the thermofluid during vessel exchange.

Vessel-to-manifold hoses are supported by the manifolds and frame, eliminating stress on the vessel.

> Quick release PEEK coupling allows rapid exchange of vessels without the use of tools. Operates over the temperature range -60°C to +190°C.

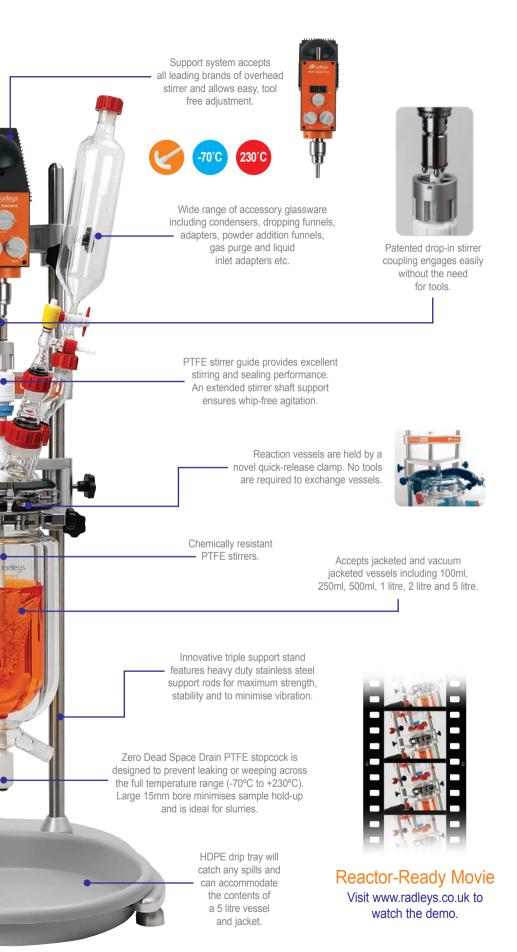

Thermofluid may be drained back to the thermoregulator or decanted via a fluid drain tap on the inlet manifold.

Heavy duty base plate with levelling feet ensures that the Reactor-Ready support stand is secure and stable.

Reactor-Ready Core System includes

- · Stand with Base, Support Rods, Bosses and all Clamps
- · Glass Reaction Vessel Lid
- Vessel FEP O-ring seal and PTFE Collar
- HDPE Drip Tray
- · Vessel to Manifold Insulated Hoses with Quick-Release Connections
- · Lower Inlet Manifold + Drain
- · Upper Outlet Manifold + Vent PTFE Stirrer Guide
- and Coupling · Stainless steel Stirrer
- **Drive Coupling** · Two stainless steel
- · Locking Rod for Support Rod

Reaction Vessel Kits make ordering vessels simple and more cost effective

These cost effective Vessel Kits include the vessel and accessories you need to get started. The Pt100 probe and anchor stirrer included in each kit are matched to the vessel size. Fach Vessel Kit includes:

- · Reaction Vessel with PTFE Stopcock
- Sidearm Couplings

 Pt100 PTFE Temperature Probe with Lemo Connector

Reactor-Ready Duo

Supports two glass reaction vessels of different or similar volume from 100ml to 5 litres

Reactor-Ready Duo shares the same unique features as Reactor-Ready, except that it supports two separate jacketed glass reaction vessels. The system can be configured to operate with a single thermoregulator controlling the temperature of both vessels simultaneously; or with two thermoregulators controlling the temperature of each vessel independently.

Unique Vessel Clamp

- supports two vessels
- change vessels independently
 - change vessels in minutes

Vessels

- 100ml to 5 litres
- combine different volumes
- vacuum jacketed option
 - process and standard geometry

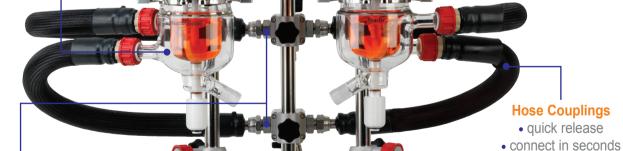

Simple Stirrer Alignment

- set and lock
- independent stirring for each vessel

Patented Stirrer Coupling

- drop in
- no tools
- no fuss

chemical resistant PEEK

Thermofluid Manifolds

- choice of two manifold kits
- single circulator manifolds
- double circulator manifolds

Why Reactor-Ready Duo?

All the benefits of Reactor-Ready with two vessels in parallel or series

Features include

- Rapid exchange of both vessels independently, with quick-release vessel clamp and hose couplings.
- · Choice of manifold kits allow two vessels to run from a single thermoregulator or two separate thermoregulators.
- System accepts two overhead stirrers which can be operated and moved independently.

Applications

- Parallel synthesis or reaction optimisation: Use similar or different size vessels and vary stirring speed, stirrer shape and temperature between vessels.
- Two stage reaction: Transfer reactant from one vessel to the other using vacuum or a pump.
- Single reaction vessel: Using the second vessel as either a receiving or feed vessel (where reagents can be pre-heated or pre-cooled prior to addition).
- Use optional Control Software to control fluid transfer between vessels.

How to order Reactor-Ready Duo...

4. Select the overhead stirrers

5. If you need a thermoregulator, hoses, hose adapters, thermofluid or accessory glassware, then select from the accessory list.

If you need automation, add the Control Software and Data Hub.

Reactor-Ready Duo Core System

Easy-to-order Reactor-Ready Duo Core system includes all the framework components required for operation

Features include

 Robust heavy-duty framework features solid stainless steel support rods.

 Two separate quick release clamps support each of the vessels independently.

Large drip tray will retain vessel contents.

· Manifold & Hose kits must be ordered separately.

Core System includes - RR121300

· Stand with Base, Support Rods, Bosses and all Clamps

• 2 x Glass Reaction Vessel Lids

• 2 x Vessel FEP O-ring seals and PTFE Centering Collars

• 2 x PTFE Stirrer Guides and Couplings

- HDPE Drip Tray
- 2 x Stainless steel Stirrer Drive Couplings
- 2 x Stainless steel Vessel Support Collars
- Locking Rod for Support Rod Bosses

Reactor-Ready Duo Manifolds & Hoses

A choice of manifold kits for use with one or two thermoregulators

Double Circulator Manifold & Hose Kit - RR121310

This double circulator kit is designed to work with two separate thermoregulators controlling the temperature of each vessel independently. With this set-up both vessels can operate at different temperatures.

- · R/H Upper Return Manifold with Vent Valve
- L/H Upper Return Manifold with Vent Valve
- R/H Lower Supply Manifold with Drain Valve
- · L/H Lower Supply Manifold with Drain Valve
- 4 x Quick-Release Insulated Hoses, 60cm
- · 4 x Sealing Caps for Hoses

Single Circulator Manifold & Hose Kit - RR121305

This single circulator kit is designed to work with one thermoregulator controlling the temperature of both vessels simultaneously. With this set-up both vessels would operate at the same temperature. The manifolds are supplied with a blanking plug should you wish to run only one vessel.

- · Central Upper Return Manifold with Vent Valve
- · Central Lower Supply Manifold with Drain Valve
- 4 x Quick-Release Insulated Hoses, 70cm
- 4 x Sealing Caps for Hoses
- · 2 x Stainless steel blanking plugs

RS Overhead Stirrers

The powerful RS range can deliver the most demanding mixing tasks whilst providing the highest safety and increased operating lifetime

Stirrer models include

- RS27 Standard for medium to high viscosity mixing up to 60,000 mPa s.
- RS37 Digital Plus for high viscosity mixing up to 100,000 mPa s with highly accurate speed settings.
- RS50 Control for medium viscosity mixing up to 10,000 mPa s with highly accurate speed and torque settings and RS232 interface for software control.
- RS100 Plus Control for precisely controlled, high viscosity mixing up to 100,000 mPa s. Digital control maintains constant speed even under changing loads. RS232 interface.

Thermoregulators & Circulators

Which Thermoregulator should you choose

- · Radleys are a Huber distribution and service partner, so we recommend the Huber range of thermoregulators, circulators, chillers and waterbaths. However Reactor-Ready is compatible with all leading brands of thermoregulator including Julabo, Lauda, Polyscience, Haake and many others.
- Also available are a full range of hoses, adapters, temperature probes and thermofluid for all applications.
- For technical assistance in selecting the thermoregulator and accessories for your application, whatever the brand, please contact your local distributor or email sales@radleys.co.uk.

Description	Temperature Range °C	Heating Power (kW)	Cooling Power at 0°C (kW)	Application Examples		
Huber	-45°C to 200°C 2.0		0.38	250ml	Cool to -10°C in <1hr, then heat to 130°C in <1/2hr	
Ministat 230	-43 € 10 200 €	2.0	0.36	1 Litre	Control at 0°C, then heat to 100°C in 20 mins	
Huber	r		0.45	500ml	Cool to -20°C in approx ½hr, then heat to 150°C in <½hr	
Petite Fleur	-40 C to 200 C	1.5	0.45	1Litre	Heat to 150°C, then cool to 0°C at > 2.5K/min	
Huber 45:04 050:0	-45°C to 250°C	1.5/3.0	0.7	1 Litre	Cool to -30°C in <1hr, then heat to 180°C in <1hr	
Unistat Tango	-45 C to 250 C			2 Litre	Heat to 180°C, then cool to 20°C in approx 1hr	
Huber	Huber 4500 05000 4.5		4.0	2 Litre	Cool to -20°C in <1/2hr, then heat to 100°C in <1/2hr	
Unistat 405	-45°C to 250°C	1.5/3.0	1.0	5 Litre	Control at 20°C, then cool to -20°C in approx 70mins	
Huber Unistat 705 -75°C to 250°	75°C to 250°C	3.0	0.65	1 Litre	Control at 20°C, then cool to -50°C in 40mins	
	-75 C to 250 C	3.0		5 Litre	Cool to -40°C at approx 1K/min, then heat to 150°C in <1hr	

The above applications are intended as a guide to the relative performance of each Huber Thermoregulator with a range of vessel sizes and are not a prediction of actual performance. To achieve optimum performance the use of vacuum jacketed vessels is recommended for below ambient temperature applications

Reaction Vessels

Jacketed, vacuum jacketed and process styles

Features include

- Precision engineered borosilicate glass vessels can be used with Reactor-Ready & Reactor-Ready Duo.
- DN100 ground and polished flat flange combines with the FEP encapsulated O-ring and our unique self centering PTFE collar to offer a leak-tight seal between the vessel and lid.
- · Convenient and cost effective vessel kits include stirrer, temperature probe and side-arm coupling.

Vessels feature V4 Zero Dead Space Drain Stopcock

- Exclusive stopcock design prevents over-tightening that can cause glass breakage.
- · Piston design allows quick and safe removal, eliminating the cleaning and assembly problems associated with other stopcock styles.
- Glass filled PTFE piston prevents leaking or weeping across the full temperature range (-70°C to +230°C)
- · Interchangeable between vessels with a full range of replacement parts and FEP O-rings.
- The large 15mm bore minimises sample hold-up and is ideal for slurries (25mm available on request).

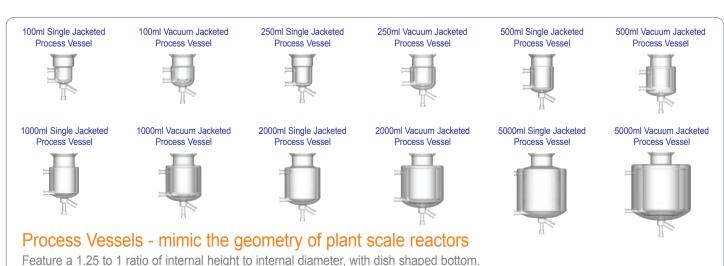

DN100 5 neck Glass Lid fits all Vessel sizes

- DN100 lid with 5 x Rodaviss, grease free, safety joints. B24 centre, B34, B29, B24 and B19 side joints.
- · All Rodaviss joints are interchangeable with ordinary A, B and C length conical joints.
- Rodaviss A length joints available if required (please add a suffix /US to lid catalogue number).

Reaction Vessel Kits

Reaction Vessel Kits make ordering vessels and accessories simple and much more cost effective

How to order Reactor-Ready

- 1. Select the Reactor-Ready Core: RR212000.
- Choose the vessel kit or kits you require by selecting vessel volume and style.
- Select the overhead stirrer you require.
- If you need a thermoregulator, hoses, hose adapters, thermofluid or accessory glassware, then select from the accessory list opposite.
- 5. If you need automation, add the Control Software and Data Hub.

Reactor-Ready Core System

RR121000

Reactor-Ready Core System includes:

- Stand with base, drip tray, support rods, bosses and all clamps
- Vessel to framework insulated hoses with quick-release connections
- · Upper & lower drain-down manifolds
- PTFE Stirrer guide and coupling
- Glass reaction vessel lid with Rodaviss sealing caps*
- Vessel FEP O-ring seal and PTFE centering collar
- 2 x Stainless steel vessel support collars

*US core supplied with US specification lid: 5 neck lid - 1 x A19, 1 x B24, 2 xA24, 1 x A29

Important: Hoses to connect the Reactor-Ready framework to your thermoregulator are not included. You will require hoses with an M24x1.5 female connection or appropriate adapters. See opposite for hoses, adapters and suitable thermoregulators.

Standard Reaction Vessel kits

These popular vessel kits include all you need to get started; glass reaction vessel, PTFE anchor stirrer paddle, PTFE Pt100 temp probe (with Lemo plug for connection to the thermoregulator) and PTFE temperature probe adapter.

RR91312/EURO RS100 Control Plus Overhead Stirrer with 230v Euro Plug

How to order Reactor-Ready Duo

- 1. Select the Reactor-Ready Duo Core: RR213000.
- 2. Choose Manifold & Hose kit for one or two circulators.
- Choose the Vessel Kit or Kits you require by selecting the vessel volume & style.
- 4. Select the overhead stirrers you require.
- 5. If you need a thermoregulator, hoses, hose adapters, thermofluid or accessory glassware, then select from the accessory list opposite.
- 6. If you need automation, add the Control Software and Data Hub.

Reactor-Ready Duo Core System

RR121300

Reactor-Ready Duo Core System includes:

- · Duo stand with base, drip tray, support rods, bosses and all clamps
- 2 x PTFE Stirrer guides and couplings
- 2 x Glass reaction vessel lids with Rodaviss sealing caps*
- 2 x Vessel FEP O-ring seal and PTFE centering collars
- 2 x Stainless steel vessel support collars

*US core supplied with US specification lid: 5 neck lid - 1 x A19, 1 x B24, 2 xA24, 1 x A29

Important: Hoses to connect the Reactor-Ready framework to your thermoregulator are not included. You will require hoses with an M24x1.5 female connection or appropriate adapters. See opposite for hoses, adapters and suitable thermoregulators.

Double Circulator Manifold & Hose Kit

RR121310

Double Circulator Manifold and Hose Kit includes:

- R/H Upper Return Manifold with Vent Valve
- L/H Upper Return Manifold with Vent Valve
- R/H Lower Supply Manifold with Drain Valve
- L/H Lower Supply Manifold with Drain Valve 4 x Quick-Release Insulated Hoses, 60cm
- · 4 x Sealing Caps for Hoses

Single Circulator Manifold & Hose Kit

Single Circulator Manifold and Hose Kit includes:

- Central Upper Return Manifold with Vent Valve
- Central Lower Supply Manifold with Drain Valve
- 4 x Quick-Release Insulated Hoses, 70cm
 - 4 x Sealing Caps for Hoses
- 4 x Stainless steel blanking plugs

Process Reaction Vessel Kits

Kits include; process vessel, turbine stirrer paddle, PTFE Pt100 temp probe (with Lemo plug for connection to the thermoregulator) and PTFE temperature probe adapter.

Reaction Vessel Support Collar

Vessel Support Collar

Important: The support collar is required to support vessels within the quick-release clamp. Two collars are supplied with each Reactor-Ready or Reactor-Ready Duo Core system, however extra collars can be purchased using the above Cat. no.

AVA Software - smart automation, tracking and control

From a single stirring hotplate to a multi-device jacketed reaction system

Automating your chemistry saves time, money and improves safety

Advantages of software automation:

- Improve productivity free up valuable research time
- · Record, share and analyse experimental results
- · Repeat experiments accurately for reproducible and consistent results
- · Share results between users to improve research and collaboration

Enhanced safety:

- · Run unattended experiments safely
- Reduce manual errors
- · Set apparatus safety limits to prevent accidents
- · Configure audio and visual alarms

Use AVA software to:

- · Eliminate time-consuming, manual data recording
- · 'Track and Repeat' what you do, as you do it and repeat in the experiment Scheduler
- · Visualise results for rapid analysis and reporting
- · Link devices for dual control e.g. pump and balance for gravimetric additions
- · Control up to four experiments in parallel

Download & try the software for FREE at www.radleys.com

Learn how the features of AVA work:

- · Simulate control of devices
- Set up apparatus and control experimental schedules
- · Share setups and schedules with other AVA users
- · Analyse results and create reports for real or simulated data

Data Hub

Integrate devices with an RS232 serial interface

Using the Data Hub, AVA can control and log from multiple 3rd party devices with an RS232 serial interface.

Data Hub Specifications

- 4 x RS232 serial port
- 2 x Pt100 temperature sensor ports, with Laptop Controller LEMO connection
- 1 x Ethernet port
- 1 x Serial and 2 x Ethernet cabels

AVA Software Kit includes:

- AVA Software
- 1 year AVA Care Support

AVA Driver Library

- AVA includes a library of pre-configured driver files allowing easy integration with a wide range of 3rd party devices.
- · Radleys also provide a 'New Driver Configuration Service'.

- 4 Port Data Hub

Shire Hill, Saffron Walden, Essex, CB11 3AZ. United Kingdom. t: +44 1799 513320 f: +44 1799 513283 e: sales@radleys.co.uk

World leaders in innovative productivity tools for chemists

Radleys provides innovative chemistry equipment for safer, cleaner, greener and more productive chemical research.

We have been manufacturing scientific glassware and laboratory instruments for over 45 years and our customers include leading blue-chip industrial and academic research facilities around the world. Our areas of expertise are focused on equipment for chemical synthesis, process development, work-up

with multiple devices
